2021-2022

**ACEC Missouri**  
AMERICAN COUNCIL OF ENGINEERING COMPANIES  
of Missouri

***ACEC Missouri Members – Designing the World Around You***

# Message from the Board Chair

The last 12 months have brought some welcome return to seeing each other more often and working together to strengthen our organization. Together we are supporting our profession and creating better leaders for the future. We continue to face current challenges to our businesses that are part of the new normal, whether from talent development, funding swings or political headwinds. Thanks to you and the exceptional leadership of our ACEC Missouri (ACEC/MO) staff, we are thriving and sharing ideas on how to meet these challenges today and tomorrow. Some highlights from this year include the below items.

- ACEC/MO updated our strategic plan, which provides our leadership a vision of priorities for the next 5 years. This spring, our Long Range Plan Committee convened with other volunteers for an intensive one-day retreat with follow-up phone calls to work on the future direction of ACEC/MO. This diversity of opinions and experiences that we bring together makes us stronger as an organization. I feel that the process was successful in achieving that. The new plan will be available to members soon and will be presented to membership at our summer conference in August.
- For the 5th year in a row, we met our National PAC fundraising goal, coming in 17th in the nation for federal PAC fundraising. I would like to thank Marc Alper, of Alper Audi Inc., for serving as our National PAC Champion and for his leadership in that area. On the state level, we have increased our fundraising efforts, the membership has responded, and I thank you for that. In 2022, we held our first state PAC fundraiser which was incredibly successful in its first year. Your Board of Directors will continue to work on PAC fundraising, and I look forward to seeing what will be achieved in the future as a strong PAC gives our industry the ability work with legislators who need to learn more about the crucial issues that confront our industry and the state.
- We improved the effectiveness of our outreach to legislators in Washington, DC by using ACEC National's resources to coordinate in-person meetings with a number of key legislators. This was well attended and so successful that we are already planning future trips. At home, our members were very effective in nurturing our relationships with state legislators in their regions and with visits to the Capitol. In short, we had a successful year in advocacy which is another step towards our strategic goal of making ACEC/MO the state's premier voice and advocate of the consulting engineering industry in Missouri.

It has been an honor to serve as your Board Chair of such a prestigious organization. The experience has been amazing, and I think we have made great strides as ACEC/MO grows and enhances its services. I appreciate the support and efforts of my fellow Board Members, Morgan Mundell and Dawn Hill, and our member firms. Without your support, we would not be the organization that we are.

Sincerely,

Timothy J. Ross

House & Senate bills were introduced during the 2022 Legislative Session

# Vision

**ACEC is the most relevant and effective industry organization EFK Moen belongs to. As a member of ACEC/MO my firm has many opportunities to enhance agency relationships, solidify industry partner / teaming relationships and grow our internal leadership. Through ACEC/MO staff advocacy and events they sponsor, we have a voice in legislation that affects our industry and our business. -**

Linda Moen, EFK Moen

In 2022, ACEC/MO updated their strategic plan, which will provide the organization a blueprint for the next 5 years. This Spring, members convened for an intensive one-day retreat with follow up phone calls where they worked on priorities and the direction of ACEC/MO. It's the diversity of opinions and experiences that we bring together which makes us stronger as an organization. That strategic plan has been presented to the membership and your Board of Directors is excited to see what this organization can achieve by working towards common goals and objectives.

The culmination of this work resulted in 5 focuses for ACEC/MO members and staff to work on.

# FOCUS

01

Position ACEC/MO as  
THE leading voice of  
engineering  
companies in Missouri

02

Reinforce ACEC/MO  
as THE advocate of  
engineering  
companies in  
Missouri

03

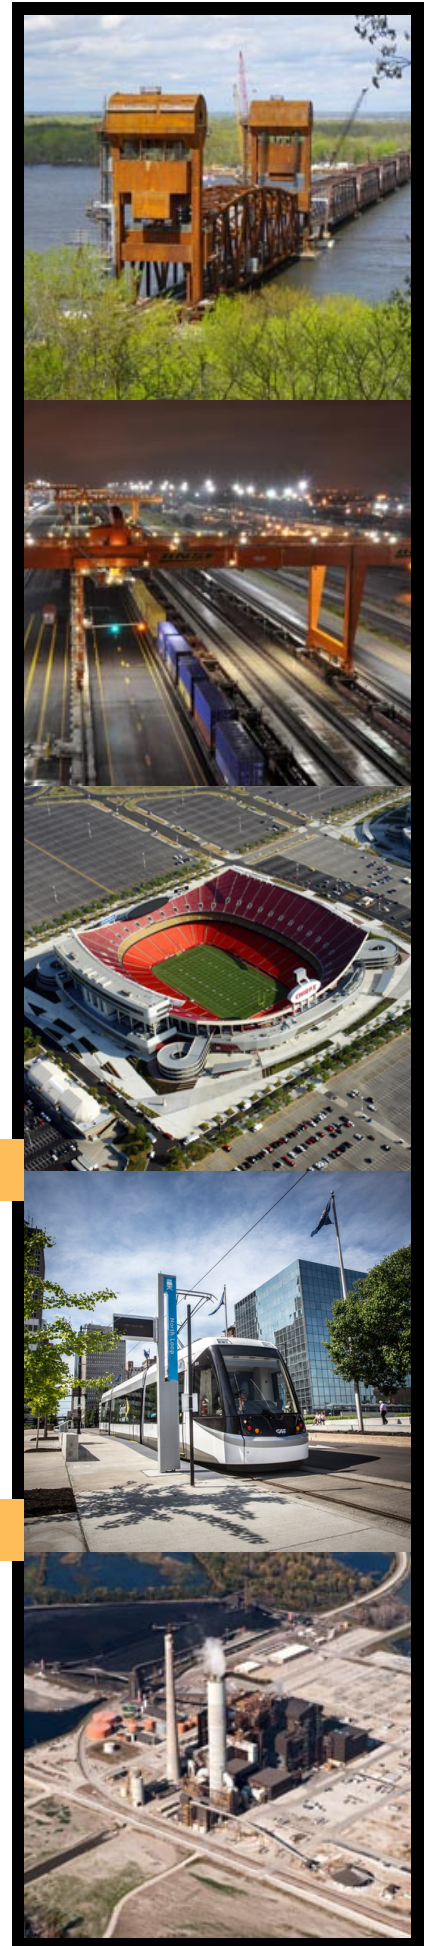

Diversify and  
enhance  
opportunities for  
emerging leaders  
throughout the  
ACEC/MO  
network

04

Serve Missouri  
engineering  
companies as  
their primary  
resource on  
business  
practices

05

Purposeful  
management:  
start, stop,  
continue

# ADVOCACY

## It's job #1 at ACEC Missouri

In January 2021, ACEC/MO was tasked by legislative leadership to lead efforts on addressing Missouri's infrastructure funding crisis. After years of time and effort, the passage of Senate Bill 262 was a monumental success for our industry and for our partner organizations. This was a much-needed boost and along with the work that ACEC National did on the Infrastructure Investment and Jobs Act and the addition of American Rescue Plan Act monies, the entire consulting engineering industry is thriving.

In 2022, over 70 individual pieces of legislation were tracked and monitored at the state level. Topics covered were repeal of the gas tax, bidding on public works projects, business taxes, water infrastructure funding, just to name a few. ACEC/MO testified on multiple issues at committee hearings on infrastructure funding, state laws regarding design build and professional licensure. ACEC/MO was also successful in working against attempts to repeal the state's gas tax and working to ensure that ARPA monies could be spent on water and wastewater projects as efficiently as possible.

### Presence

ACECMO staff maintain a full-time presence in the Capitol and work throughout the year with elected and state leaders and government officials in Jefferson City.

### Engagement

ACEC/MO Members engage both state and federal officials throughout the year. This year ACEC/MO did their first ever independent "fly-in" at Washington D.C. and met in person with Representatives Cleaver, Graves, Luetkemeyer, Smith and U.S. Senator Roy Blunt.

### Connection

Over the last year, arrangements were made to bring elected officials to Member offices and ACEC/MO events. This included Lt. Governor Mike Kehoe, House Transportation Chair Becky Ruth, Senate Minority Leader John Rizzo, Senators Lincoln Hough and Greg Razer and Senate President Pro Tem Dave Schatz to name a few.

**ACEC/MO is a critical strategic partner for Missourians for Transportation Investment. The leadership the organization provides is invaluable in our efforts to secure transportation investment in Missouri, such as SB 262. Whether it's your CEO's service on the MFTI board of directors, the financial support provided by the organization, or the strong participation of ACEC/MO members in MFTI efforts and events, ACEC/MO has always been a critical partner in our success.** - Jeff Glenn, Executive Director, MFTI

**ACEC Missouri is important to our firm, and our industry. One reason is the organization has been such a strong voice on legislative and regulatory issues over the years, including last years passage of Senate Bill 262. Throughout the long process of promoting the need for sustainable infrastructure funding, ACEC Missouri has been there leading the charge on talking to national, state, and local elected officials and the public about the economic, safety and quality of life benefits that this funding will provide.** - Dan Meckes, CEO of Crawford, Murphy & Tilly, Inc.

# SUPPORTING AND ENGAGING THOSE WHO SUPPORT US

## STATE AND NATIONAL PAC FUNDRAISING

It's up to us to inform elected officials about important public policy issues and our needs as employers and as owners of engineering firms. If we do not, another industry or group – perhaps with interests at odds with our own – is likely to fill the vacuum we leave. As is said in the Missouri Capitol, if you don't have a seat at the table, people forget about you. And when they forget about you, bad things happen.

**\$62,235 raised**

for ACEC Missouri PAC

**\$25,150 raised**

for ACEC National PAC

## NATIONAL

ACEC/MO, in partnership with ACEC National, hosts and participates in several fundraising events throughout the year at both the state and national levels. This includes the sweepstakes you see at Missouri Council Meetings, the National PAC Golf Tournament conducted here in Missouri and various events held at National Meetings. The contributions made at these events help ACEC/MO meet our goal and help our voice to be heard at the national level.

ACEC/MO once again achieved our goal in 2021.

## STATE

Through increased communication, events and leadership, ACEC/MO has increased their capacity and is working on building out the association's ability to invest in meaningful candidate campaign support at the state level. Over the last year, we have increased our state PAC fundraising by 90%. A strong state PAC gives our industry access to legislators who need to learn more about the crucial issues that confront our industry and that they understand the perspective of the owners and employees of private engineering companies.

**ACEC/MO members work tirelessly as builders and innovators to help move Missouri forward. I want to thank each of them for their important work in their communities and our great state.**

- Lt. Governor Mike Kehoe

# PROVIDING THE FOUNDATION FOR ACEC/MO AND THE CONSULTING ENGINEERING INDUSTRY

## Future Leaders Academy – preparing the next generation of leaders in the consulting engineering industry

Since 2010, ACEC/MO has been working to build leadership in the industry. Identified as a prime focus area through our recently adopted strategic plan, ACEC/MO is working to enhance our already incredibly successful FLA program with new services and experiences.

**As I started getting involved with more business and project management activities at TranSystems, I did not fully understand what I was doing or even why. When I was asked if I would like to participate in FLA, I jumped on the opportunity as I had heard great things about the program. It truly exceeded my expectations. Being a part of the program not only helped me understand more of the logic behind certain business practices we use, but it ignited thoughts and ideas on what I could do to better contribute to, not only my firm's success, but to my own as well.** - Kandi Spraggs, TranSystems. 2021 Future Leaders Academy graduate.

## Advocacy

Upon graduation from FLA, participants are provided the opportunity, with assistance from ACEC/MO members and staff, to engage with their elected officials one on one. This builds the organization's effectiveness and makes us THE advocate of engineering companies in Missouri.

## Diversity & Inclusion

Our new format includes an entire session dedicated to diversity and inclusion to ensure that ACEC/MO is a welcoming organization where all members are included, involved, and have the opportunity to pursue key roles in the life of the Council.

## Bringing it together

FLA participants are now presented the opportunity to engage with the Council by participating in the ACEC/MO Summer Meeting. This involves attending a committee meeting of their choice and a Membership/Board meeting.

# Keeping members informed and serving Missouri engineering companies as their primary resource on business practices

**ACEC Missouri is very important to me because it represents the business interests of the consulting engineering companies throughout the state. In addition, the ACEC Missouri liaison committees provide invaluable insight into the priorities of our clients and allow us to build stronger relationships with the agencies we serve.** - Buddy Desai, Vice President of Hg Consult, Inc.

ACEC/MO maintains 17 individual liaison committees that interact with various entities across the state. This includes the Corps of Engineers, Missouri Departments of Transportation and Natural Resources, cities of Kansas City and St. Louis, Metropolitan Sewer District, just to name a few. These committees provide ACEC/MO members the access to information they need to make better decisions for their companies and clients.

We also have changed the format of our quarterly Council meetings. Our Government Affairs and Environmental Committees now have the opportunity to invite speakers in, we are providing more opportunity for networking among members and our agendas are more conducive to member's busy professional and personal lives. Through member surveys, these changes have been well received.

# ENGAGING OUR CLIENTS

ACEC/MO member volunteers are the backbone of the organization and committee work is one of the most important benefits to our members. ACEC/MO offers its members a wide variety of committees and liaison committees tailored to the special interests of its members. This participation will dramatically increase the return on your dues investment in ACEC/MO. If you are an employee of a member firm, you have the opportunity to get involved by participating in a committee or liaison. The purpose of our committees is to provide members with the opportunity to improve working relationships with agency personnel and work on public policy issues and other areas that affect the consulting engineering industry. Each liaison committee has its own agenda, but communications and problem-solving are primary concerns.

# 2022 Engineering Excellence Awards *ENGINEERING Excellence AWARDS*

Engineering Excellence Awards honor engineering achievements that demonstrate the highest degree of merit and ingenuity and provide a major contribution to technical, economic, or social advancement. An eminent panel of judges from outside the membership chose the 2022 winning projects from entries submitted across the state. Five of the top entries went on to compete at the American Council of Engineering Companies (ACEC) competition in Washington, D.C.

## *Grand Conceptor Award*

### **CDM Smith Inc., Kansas City**

Project Title: Co-Digestion to Renewable Gas (RNG) Pipeline  
Injection at the Des Moines, Iowa, Water Reclamation Facility  
Client/Owner: Des Moines Metropolitan Wastewater Reclamation Authority

## *Grand Awards*
