**Guide to the selection of ENGINEERING,
ARCHITECTURAL and LAND SURVEYING
services in Missouri**

At Your Service

***AMERICAN COUNCIL OF ENGINEERING
COMPANIES OF MISSOURI***

Highly qualified and experienced design firms offering engineering, architectural and land surveying services to business, industry, and government are listed in this new Directory of the American Council of Engineering Companies of Missouri.

In every major area of the State and in every specialized field of design, our members stand ready to serve you whenever the need arises.

For the most current information of member firms, check out our website, www.acecmo.org, to use a searchable database.

Contact ACEC/MO or see our website for:

- membership information and an application
- up-to-date addresses and contacts for firms listed here or joined after publication
- easy-to-follow procedure for properly procuring engineering services

Contact us by Email for:

- address corrections for those receiving this Directory by mail
- addition to our mailing list to receive future Directories

INTRODUCTION TO CONSULTING ENGINEERING

The member firms of the American Council of Engineering Companies of Missouri (ACEC/MO) can be privately or publicly owned. Each must have one or more principals registered as professional engineers to practice engineering in the State of Missouri.

Those firms chartered as corporations must have certificates of authority from the Missouri Board for Architects, Professional Engineers, Land Surveyors and Landscape Architects to offer engineering, architectural, or land surveying services in Missouri.

Member firm representatives listed in this Directory serve as principals of the firm, authorized to and do

act for the firm on engineering policies. They may be professional engineers or other business professionals.

Distinguishing private practice consulting engineers from engineers in public agencies, industry and educational institutions is important. Consulting engineers provide independent judgment and service to multiple clients without obligation to special interests, organizational promotions, particular products or manufacturers. The consulting engineer serves the client directly, bringing expertise, technical ability, sound judgment and skill in his field of practice.

Owners and principals of professional design firms are member representatives at Council Meetings. These professional engineers or other business professionals help carry out the objectives of the Council: legislative/governmental affairs, business practices, public affairs, and organizational affairs.

ACEC/MO - AT A GLANCE

The American Council of Engineering Companies of Missouri, Inc., ACEC/MO, is an organization of professional engineering firms in private practice. Formed July 12, 1955 and incorporated under the laws of the State of Missouri, ACEC/MO, is a founding member organization of American Council of Engineering Companies (ACEC). The objectives of the organization as expressed in its Strategic Plan are:

- **BUSINESS AFFAIRS** - *Provide opportunities for member firms to advance their business practice of consulting engineering,*
- **PUBLIC AFFAIRS** - *Promote image and effectiveness of ACEC/MO and its member firms,*
- **GOVERNMENTAL AFFAIRS** - *Maintain a strong governmental affairs program,*
- **ORGANIZATIONAL AFFAIRS** - *Provide staff and organization that meets the long-term needs of the Council and its member firms.*

ACEC/MO promotes professional qualifications-based selection for design services. ACEC/MO provides

educational, professional, and insurance programs for its members and their employees.

ACEC/MO disseminates information explaining the professional principles and services of consulting engineers. It conveys to the general public the meaning of private professional engineering practice, and aims to develop understanding and appreciation of the scope and value of services provided by consulting engineers.

ACEC/MO publishes a directory of its members, which is made available to potential users of engineering services. **ACEC/MO's annual Engineering Excellence Awards** honor engineering achievements demonstrating the highest degree of merit and ingenuity. Winning Missouri projects are submitted to the ACEC national competition.

ACEC/MO has over 130 member and associate member firms, representing over 340 member firm principals and over 11,100 employees.

PAST PRESIDENTS

1956	Joe Williamson, Jr.	1982	John A. Boyd, Jr.	2008	Robert L. Goodwillie
1957	Hueston Smith	1983	Robert C. Flory	2009	David A. Diestelkamp

ACEC

The American Council of Engineering Companies, (ACEC), 1015 15th Street, N.W, Suite 802, Washington, D.C. 20005, Phone: 202-347-7474, is the national organization of engineers engaged in the practice of engineering. It is made up of 52 Member Organizations of which ACEC/MO is one.

ACEC is devoted to the advancement of the practice of engineering, to the promotion of private enterprise and to the improvement of the business environment of professional engineers engaged in engineering.

ACEC is the source of information and cooperative services for common purposes and benefits to all members in the various branches of engineering.

It works for maintenance of the highest ethical standards and speaks for engineers throughout the United States. ACEC disseminates information explaining the services and value of engineers to other professional organizations, business, government, and the public.

ACEC now has over 5,000 member firms, with more than 600,000 engineers, architects, land surveyors, and other specialists.

ACEC/MO members have actively served and continue to serve the national organization in several capacities such as trustees of the ACEC insurance program, as national officers, and as chairman and members of ACEC committees.

ACEC FELLOWS

The American Council of Engineering Companies is proud to recognize the following Missouri engineers who have been recognized by ACEC as Fellows. The Fellows program gives recognition to engineers who have made notable contributions to the profession of engineering.

Edmond D. Alizadeh

ECONOMIC IMPACT

National Leadership

Four of the top 100 professional design firms are ACEC/MO members who have their worldwide headquarters in Missouri. In addition, 43

ACEC/MO firm offices are headquartered or are branches of firms ranked among the top 500 design firms in the nation according to Engineering News-Record.

COUNCIL STATISTICS

Profile of ACEC/MO Firms - FIRM SIZE IN MISSOURI

Profile of ACEC/MO Firms - SERVICES OFFERED

2024 ENGINEERING EXCELLENCE AWARDS

Engineering Excellence Awards honor engineering achievements that demonstrate the highest degree of merit and ingenuity and provide a major contribution to technical, economic, or social advancement. An eminent panel of judges from outside the membership chose the 2024 winning projects from entries submitted across the state. Five of the top entries went on to compete at the American Council of Engineering Companies (ACEC) competition in Washington, D.C.

Grand Conceptor Award

Crawford, Murphy & Tilly, Inc.

Project: MacArthur Bridge Approach West Span Replacement
Client/Owner: Terminal Railroad Association of St. Louis

Grand Awards

ABNA Engineering, Inc.

Project: Forest Park Waterways Bathymetric Survey
Client/Owner: Forest Park / St. Louis Board of Public Service

Burns & McDonnell

Project: Ameren Missouri Community Solar Project - Montgomery County
Client/Owner: Ameren Missouri

Burns & McDonnell

Project: STL Jet Fuel System Upgrades and Remediation
Client/Owner: STL Fuel Company LLC and St. Louis International Airport

2024 ENGINEERING EXCELLENCE AWARDS

HR Green, Inc.

Project: Route 94 / Route 364 / Muegge Road Interchange Project
Management Consultant (PMC)
Client/Owner: Missouri Department of Transportation

IMEG

Project: Missouri Botanical Garden Jack C. Taylor Visitor Center
Client/Owner: Missouri Botanical Garden

TREKK Design Group, LLC

Project: Distribution Manhole Inspection Program
Client/Owner: Evergy

TWM, Inc.

Project: Route 100 (Manchester Road) Rehabilitation
Client/Owner: Missouri Department of Transportation

2024 ENGINEERING EXCELLENCE AWARDS

We would also like to recognize the following firms that received the 2024 Honor Awards for their projects:

GBA, Inc.

Project: Route 171 Intersection Safety Improvements
Client/Owner: Missouri Department of Transportation

Lochmueller Group, Inc.

Project: Stormwater Master Plan
Client/Owner: City of Glendale

Lochmueller Group, Inc.

Project: Centennial Greenway: Christy Drive to Schaefer Park
Client/Owner: Great Rivers Greenway

Olsson, Inc.

Project: MSU Grand Avenue Pedestrian Underpass
Client/Owner: Missouri State University

TREKK Design Group, LLC

Project: I-49 Outer Road Conversion Design-Build
Client/Owner: City of Grandview

2024 DISTINGUISHED SERVICE AWARDS

This award recognizes the member firms at their 25th year of business and thereafter at 10 year intervals, with special recognition for their 50th & 100th anniversary. The Distinguished Service Award recipients for 2024 are listed below.

BFA, Inc.

50 Years of Service

Palmerton & Parrish, Inc.

35 Years of Service

HNTB Corporation

110 Years of Service

Strickland Engineering

45 Years of Service

DESIGN ENGINEERING SERVICES

◆ WHAT the Design Engineering Firm Offers You

The engineering firm can offer:

- preliminary planning and feasibility studies
- engineering and architectural design
- evaluation and award of construction contracts
- general coordination of construction projects.

The types of projects which a consulting engineering firm may be called on to design include:

- * highways
- * bridges
- * airports
- * terminal facilities
- * water resources development
- * water supply
- * flood control
- * sewage disposal
- * water treatment
- * refuse disposal
- * subsurface soil testing
- * engineering for buildings of many kinds --

factories, plants, warehouses, mills, power plants, banks, hospitals, churches, schools, offices, apartments, shopping centers, sports stadiums, hotels, and many others.

◆ WHEN Do You Need Design Engineering Services

An engineering firm is retained whenever a client desires specialized knowledge, unbiased and independent engineering judgment, broad experience and the application of modern engineering techniques and practice. The firm is available when an engineering staff does not exist in-house, or when the existing engineering staff is inadequate, or lacks competence in a specific area. Above all, an engineering firm provides its services on an "as needed" basis, which assures overall efficiency, economy and quality. The engineering firm may work for government, commercial or industrial clients directly or as part of a design team.

◆ HOW Do You Select a Design Engineering Firm

The dominant factor in the selection of an engineering firm is its qualifications to solve the problems under consideration. The qualifications are a reflection of the firm's:

- * experience
- * staff and facilities
- * integrity and reputation
- * concept of the project

- * knowledge of local conditions.

For the State of Missouri and its political subdivisions, the selection of engineers is governed by RSMo Section 8.285 to 8.291 which is reprinted on the next page. This act also provides an excellent guideline for selection by other potential clients. These qualifications-based selection procedures are spelled out in more detail in the publication, "**QBS Manual, a Public Owner's Design Services Workbook Outlining a Step-by-Step Process for Selecting Design Professional Services**", which is available free from ACEC/MO. We also have another publication available, "**QBS - A Guide to Proper Selection Procedures.**"

◆ METHODS of Payment for Design Engineering Services

Five common methods of payment for engineering services are:

- * percentage of the construction cost of the project
- * a fixed lump sum
- * straight time charges
- * fixed lump sum plus expenses
- * retainer on an annual or other basis.

Selection of an engineering firm based upon the lowest price (bid basis) is not a true measure of the worth of professional services because it does not consider education, technical knowledge, experience, and imagination and ingenuity of the consulting engineer. These factors have far more influence on the total construction and operating cost of a project -- than the initial cost of engineering.

◆ WHERE to Find a Qualified Design Engineering Firm

Qualified design engineering firms located in the State of Missouri can be selected from those listed in this roster, all of which are members of ACEC/MO. Our office can help you find firms qualified for your project. Call 573-634-4080. The complete list is also available on our website at www.acecmo.org. A national directory comprised of over 5,000 design firms in all 52 states is available from ACEC's website at www.acec.org.

QUALIFICATIONS-BASED SELECTION METHOD

The following is Missouri Law (RSMo Section 8.285 to 8.291) regarding the procurement of professional design services and its purpose to ensure that the State and its political subdivisions receive the most competent professional services available, based on demonstrated qualifications for the type of services required. Federal law reflects the same procedure and ACEC/MO recommends this procedure to any potential user of design services.

8.285. Policy on contracts for architectural engineering, land surveying services. -- It shall be the policy of the state of Missouri and political subdivisions of the state of Missouri to negotiate contracts for architectural, engineering and land surveying services on the basis of demonstrated competence and qualifications for the type of services required and at fair and reasonable prices.

8.287. Definitions. -- As used in sections 8.285 to 8.291 unless the context specifically requires otherwise:

(1) **"Agency"** means each agency of the state and each agency of a political subdivision thereof authorized to contract for architectural, engineering and land surveying services;

(2) **"Architectural services"** means any service as defined in section 327.091, RSMo;

(3) **"Engineering services"** means any service as defined in section 327.181, RSMo;

(4) **"Firm"** means any individual, firm, partnership, corporation, association or other legal entity permitted by law to practice the profession of architecture, engineering or land surveying and provide said services;

(5) **"Land surveying services"** means any service as defined in section 327.272, RSMo;

(6) **"Project"** means any capitol improvement project or any study, plan, survey or program activity of a state agency or political subdivision thereof, including development of new or existing programs.

8.289. Agencies using services to be furnished statement of firm's qualifications and performance data. -- Present provisions of law notwithstanding, in the procurement of architectural, engineering or land surveying services, each agency which utilizes architectural, engineering or land surveying services shall encourage firms engaged in the lawful practice of their professions to annually submit a statement of qualifications and performance data to the agency. Whenever a project requiring architectural, engineering or land surveying services is proposed for an agency of the state or political subdivision thereof, the agency shall evaluate current statements of qualifications and performance data of firms on file together with those that may be submitted by other firms regarding the proposed project. In evaluating the

qualifications of each firm, the agency shall use the following criteria:

(1) The specialized experience and technical competence of the firm with respect to the type of services required;

(2) The capacity and capability of the firm to perform the work in question, including specialized services, within the time limitations fixed for the completion of the project;

(3) The past record of performance of the firm with respect to such factors as control of costs, quality of work, and ability to meet schedules;

(4) The firm's proximity to and familiarity with the area in which the project is located.

8.291. Negotiation for contract -- not applicable, for certain political subdivisions. --

1. The agency shall list three highly qualified firms. The agency shall then select the firm considered best qualified and capable of performing the desired work and negotiate a contract for the project with the firm selected.

2. For a basis for negotiations the agency shall prepare a written description of the scope of the proposed services.

3. If the agency is unable to negotiate a satisfactory contract with the firm selected, negotiations with that firm shall be terminated. The agency shall then undertake negotiations with another of the qualified firms selected. If there is a failing of accord with the second firm, negotiations with such firm shall be terminated. The agency shall then undertake negotiations with the third qualified firm.

4. If the agency is unable to negotiate a contract with any of the selected firms, the agency shall re-evaluate the necessary architectural, engineering or land surveying services, including the scope and reasonable fee requirements, again compile a list of qualified firms and proceed in accordance with the provisions of sections 8.285 to 8.291.

5. The provisions of sections 8.285 to 8.291 shall not apply to any political subdivision which adopts a **qualification-based selection** procedure **commensurate with state policy** for the procurement of architectural, engineering and land surveying services.

ACEC PROFESSIONAL & ETHICAL CONDUCT GUIDELINES

PREAMBLE

Consulting engineering is an important and learned profession. The members of the profession recognize that their work has a direct and vital impact on the quality of life for all people. Accordingly, the services provided by consulting engineers require honesty, impartiality, fairness and equity and must be dedicated to the protection of public health, safety and welfare. In the practice of their profession, consulting engineers must perform under a standard of professional behavior which requires adherence to the highest principles of ethical conduct on behalf of the public, clients, employees and the profession.

I. Fundamental Canons

Consulting engineers, in the fulfillment of their professional duties, shall:

1. Hold paramount the safety, health and welfare of the public in the performance of their professional duties.
2. Perform services only in areas of their competence.
3. Issue public statements only in an objective and truthful manner.
4. Act in professional matters for each client as faithful agents or trustees.
5. Avoid improper solicitation of professional assignments.

II. Rules of Practice

1. Consulting engineers shall hold paramount the safety, health and welfare of the public in the performance of their professional duties.
 - a. Consulting engineers shall at all times recognize that their primary obligation is to protect the safety, health, property and welfare of the public. If their professional judgment is overruled under circumstances where the safety, health, property or welfare of the public are endangered, they shall notify their client and such other authority as may be appropriate.
 - b. Consulting engineers shall approve only engineering work which, to the best of their knowledge and belief, is safe for public health, property and welfare and in conformity with accepted standards.
 - c. Consulting engineers shall not reveal facts, data or information obtained in a professional capacity without the prior consent of the client except as authorized or required by law or these Guidelines.
 - d. Consulting engineers shall not permit the use of their name or firm nor associate in business ventures with any person or firm which they have reason to believe is engaging in fraudulent or dishonest business or professional practices.
 - e. Consulting engineers having knowledge of any alleged violation of these Guidelines shall cooperate with the proper authorities in furnishing such information or assistance as may be required.
2. Consulting engineers shall perform services only in the areas of their competence.
 - a. Consulting engineers shall undertake assignments only when qualified by education or experience in the specific technical fields involved.
 - b. Consulting engineers shall not affix their signatures to any plans or documents dealing with subject matter in which they lack competence nor to any plan or document not prepared under their direction and control.
 - c. Consulting engineers may accept an assignment outside of their fields of competence to the extent that their services are restricted to those phases of the project in which they are qualified and to the extent that they are satisfied that all other phases of such project will be performed by registered or otherwise qualified associates, consultants or employees, in which case they may then sign the documents for the total project.
3. Consulting engineers shall issue public statements only in an objective and truthful manner.
 - a. Consulting engineers shall be objective and truthful in professional reports, statements or testimony. They shall include all relevant and pertinent information in such reports, statements or testimony.
 - b. Consulting engineers may express publicly a professional opinion on technical subjects only when that opinion is founded upon adequate knowledge of the facts and competence in the subject matter.

- c. Consulting engineers shall issue no statements, criticisms, or arguments on technical matters which are inspired or paid for by interested parties, unless they have prefaced their comments by explicitly identifying the interested parties on whose behalf they are speaking and by revealing the existence of any interest they may have in the matters.
4. Consulting engineers shall act in professional matters for each client as faithful agents or trustees.
 - a. Consulting engineers shall disclose all known or potential conflicts of interest to their clients by promptly informing them of any business association, interest or other circumstances which could influence or appear to influence their judgment or the quality of their services.
 - b. Consulting engineers shall not accept compensation, financial or otherwise, from more than one party for services on the same project, or for services pertaining to the same project, unless the circumstances are fully disclosed to, and agreed to, by all interested parties.
 - c. Consulting engineers in public service as members of a governmental body or department shall not participate in decisions with respect to professional services solicited or provided by them on their organizations in private engineering practices.
 - d. Consulting engineers shall not solicit or accept a professional contract from a governmental body on which a principal or officer of their organization services as a member.
 5. Consulting engineers shall avoid improper solicitation of professional assignments.
 - a. Consulting engineers shall not falsify or permit misrepresentation of their, or their associates', academic or professional qualifications. They shall not misrepresent or exaggerate their degree of responsibility in or for the subject matter of prior assignments. Brochures or other presentations incident to the solicitation of assignments shall not misrepresent pertinent facts concerning employees, associates, joint ventures or past accomplishments with the intent and purpose of enhancing their qualifications and their work.
 - b. Consulting engineers shall not offer, give, solicit or receive, either directly or indirectly, any political contribution in an amount intended to influence the award of a contract by public authority, or which may be reasonably construed by the public of having the effect or intent to influence the award of the contract. They shall not offer any gift or other valuable consideration in order to secure work. They shall not pay a commission, percentage or brokerage fee in order to secure work except to a bona fide employee or bona fide established commercial or marketing agencies retained by them.

Adopted October 1980

Special Note:

These guidelines do not prohibit design competitions, free services, or contingent arrangements.

2024-2025 ACEC/MO COMMITTEE CHARGES

Advisory - This Committee is charged with recommending actions and compensation for the staff, preparing an annual list of nominees for election to the various Board positions required by the Bylaws, recommending Council actions in regards to registration and ethical issues, and identifying individuals for the distinguished service awards including Fellows, Life Members, and New Principals.

Budget & Finance - This Committee shall study fiscal direction and maintain fiscal integrity for the Council's long-term health in accordance with the Bylaws. The members of this committee shall annually prepare a Council budget recommendation for the coming year.

Business Practices / Programs - This Committee is responsible for addressing common business issues such as insurance, risk management, business management, contract documents, peer review, software, and other items that advance the business practice of member firms. This Committee shall, in cooperation with the President and other Committees, assist in preparing a calendar of meetings/seminars for the year, including stand-alone and those in conjunction with a regular ACEC/MO quarterly meeting, select program topics and suggest possible speakers.

Bylaws - This Committee shall prepare revisions to the Bylaws when and as necessary to reflect changes in the Council. *(WILL APPOINT AS NEEDED)*

Diversity - This Committee shall foster diversity within our member companies; help our member firms encourage minority and woman employment while meeting legal and risk management requirements; and assist in the development of an educational and support infrastructure to encourage minority and woman careers in STEM fields.

Engineering Excellence - This Committee is charged with the responsibility of establishing criteria for the annual project awards competitions, selecting the date and judges for the competition judging, attend the judging and determine the winners from judging scores. Also, they will help in the presentation of awards at the Awards Banquet. Shall see that appropriate winning entries are sent on to the national competition in a timely manner.

Environmental - This Committee shall report to the Council and/or Governmental Affairs Committee its appraisals of and its reactions to important governmental and private sector activities and legislation in which any combination of energy, environmental and economic subjects interact.

Future Leaders - The Committee shall assist ACEC/MO staff with speakers and programs for the annual Future Leaders Academy; and assist in getting registrants for the program if necessary.

Governmental Affairs - This Committee shall develop and recommend to the Council a current and long-term legislative program. Committee members shall work to get Council priorities into the legislative process, review other pending state legislation at the state level and participate in the legislative process to promote Council priorities and defeat adverse legislation. They shall keep the Council informed on pending legislation. The Committee shall be in charge of the Council's participation in state legislative functions and shall represent the Council at meetings with other organizations concerning legislation.

Long Range Planning - This Committee is charged with reviewing the long-range plan on an annual basis and recommending revisions when and as necessary to reflect changes in the Council.

Membership - This Committee is responsible for recruiting new member firms, analyzing membership trends, developing an annual membership recruitment/retention plan, and implementing a program for new firm orientation.

PAC - This is a group of six Trustees appointed for 3-year terms, with responsibility for seeking annual participation from members, evaluating political candidates, and recommending support. Two Trustees are appointed each year and must be contributors to the ACECMO/PAC.

Professional Procurement - This Committee shall develop an action plan for promoting proper qualifications-based selection of engineering services under Missouri law, identify violators of proper selection procedures, and develop strategies for response. The Committee shall develop ways to recognize those clients who support proper qualifications-based selection procedures with an Annual Award.

Public Relations - This Committee shall give guidance to all Council public relations activities and internal communications programs. *(WILL APPOINT AS NEEDED)*

Transportation - This Committee shall monitor legislation, regulations and other activities and programs in the transportation fields, including highways, railroads, aviation and mass transit and recommend Council positions on appropriate issues.

Vertical Construction (formerly Interprofessional) - This Committee shall develop and conduct programs to serve the needs of member firms engaged in professional design practice where other consulting engineers, architects, and other design/construction professionals are the client. *(WILL APPOINT AS NEEDED)*

2024-2025 ACEC/MO COMMITTEES

Advisory

Kevin Wallace, Chair; Mike DeBacker; Buddy Desai; Shawna Erter; Steve Hicks; Vicki LaRose; Kristen Leathers-Gratton

Budget & Finance

Kristen Leathers-Gratton, Chair; Buddy Desai; Shawna Erter; Bob Gilbert; Tom Gredell; Steve Hicks; Vicki LaRose; Kevin Wallace; Steve Wells

Business Practices & Programs

Todd Welz, Chair; Abe Adewale; Nicole Adewale; Marc Alper; Steve Alsbury; Ben Asnicar; Neil Brady; Margaret Bruns; Scott Cogan; Bruce Dawson; Kate Dirks Canton; Jay Ellington; Mike Erdtmann; Ryan Hagerty; Chris Harker; John Huss; Lorne Jackson; Tim Jardine; LaWanda Jones; Ross Kasmann; Michelle Kratzer; Vicki LaRose; Terry Leeds; Chris Linneman; Julie McNiff; Marjorie Melton; Linda Moen; Tawn Nugent; Tony O'Malley; Jeanne Olubogun; Erin Parrish; Michael Puro; Jay Rakers; Jeff Rensing; Erica Ridgway; Tim Ross; Dick Scott; Nick Thomas; Mike Walker; Srinu Yanamanamanda

Diversity

Kimberly Robinett, Chair; Abe Adewale; Nicole Adewale; Steve Alsbury; Molly Barletta; Jim Cherney; Colleen Connor; Kelley Davis; Bruce Dawson; Dan DeArmond; Buddy Desai; Darrell Eilers; David Ford; Tirzah Gregory; Earl Harrison; LaWanda Jones; Michelle Kratzer; Vicki LaRose; Marjorie Melton; Linda Moen; Jeanne Olubogun; Scott Perkins; Anne Schroer; Vernal Stewart; Jessi Terri; Lorenzo Thompson; Barb Wells; Mike Wild; Srinu Yanamanamanda; Pouya Yousefzadehfard

Engineering Excellence

Rob Krewson, Co-Chair; Andrew Potthast, Co-Chair; Marc Alper; Rick Bennett; Scott Cogan; Kelley Davis; Buddy Desai; Ryan Hagerty; Michele Keal; Michelle Kratzer; Kevin Kriete; Lou Kuelker; Holly Lehmkuhl; Chris Linneman; Tawn Nugent; Allen Smith; Breck Washam; John Zimmermann

LEGEND TO ENGINEERING SERVICES

ACOUSTICAL

Acoustics; Noise control; Vibration and structural dynamics -- analysis and testing; Industrial noise control/monitoring; Sound system designs

ARCHITECTURAL

Architecture; Interior design; Landscape architecture; Urban design

CIVIL

Highways; Streets; Bridges; Recreational facilities; Tunnels; Utility systems; Water and sewage systems; Sanitary; Solid waste disposal

CONSTRUCTION MANAGEMENT

Construction supervision; Construction surveys; Construction observation; Management of design and construction phases of a project

ELECTRICAL

Building wiring; Communications; Electric and Electronic systems; Elevators and escalators; Fire protection systems; Instrumentation and controls; Lighting; Power production and transmission; Signal systems

ENVIRONMENTAL

Environmental impact statements/assessments; Asbestos assessment; Abatement designs; Hazardous materials remedial investigations/feasibility studies; Identifying hazardous and toxic materials; Materials testing

FORENSIC

Expert testimony

GEOTECHNICAL

Foundation studies; Geological investigations; Groundwater investigations; Soils investigation and testing; Soil and rock mechanics; Earth and earth-rock dams, Slope stability and shoring design; Geohydrology; Geophysics; Earthquake engineering and geotechnical instrumentation

INDUSTRIAL

Management studies; Manufacturing economics; Manufacturing facilities; Operations analysis and scheduling; Production methods and processes; Materials handling

MECHANICAL

Heating, ventilation and air conditioning design; Plumbing; Boiler plants; Cold storage; Heat transfer; Energy studies

PLANNING

Land use and site planning; Comprehensive city, regional and recreational planning

STRUCTURAL

Bridges; Buildings; Foundations; Parking garages; Structural analyses; Towers

SURVEYING

Land surveys; Boundary; Topographic; Construction staking; Mapping; Photogrammetric

TRANSPORTATION

Airports; Highways; Parking system; Railroads; Traffic studies; Transportation systems

DESIGN SERVICES INDEX

The chart below is intended to provide "at-a-glance" information about the services provided by ACEC/MO member firms. (See LEGEND on preceding page.)

USING THIS DIRECTORY

American Council of Engineering Companies of Missouri Directory 2024-2025

The purpose of this directory is to foster a better understanding of the relationships between the client, the public and the professional engineer in private practice.

Firms listed in this directory are members of the American Council of Engineering Companies of Missouri. The firms maintain offices or provide engineering services in Missouri, are staffed and qualified, registered engineers and are pledged to uphold high professional and ethical standards. By their membership, they subscribe to the code of professional conduct established by law and are recognized as responsible, independent and impartial experts in their fields of practice.

This directory of Missouri consulting engineers will assist in securing qualified engineering services for any project. Information is also available on consulting engineering services in other states. For more information about American Council of Engineering Companies of Missouri member firms or members of the American Council of Engineering Companies in other states, write or call ACEC/MO.

How to Use this Directory

Firm Name ———— **ABC Engineering, Inc.**

Address ———— **3400 Manchester Road**
St. Louis, Missouri 63111

Phone and Fax Numbers, E-mail Address, Website ———— **(314) 333-3333** **FAX: (314) 333-3334**
Email: abc@abcco.com
URL: www.abcco.com

Branch Offices ———— **Branch Office:**
211 Madison Street
Jefferson City, Missouri 65101
(573) 666-6666 **FAX: (573) 666-6667**

Other State Offices ———— **Other Offices In:**
1 State

Firm Specialties ———— **Rep(s):**
John Doe

Minority Firm Status ———— **Activities:**
ABC Engineering is a full-service architectural and engineering firm. Offers expertise in the architectural, environmental, geotechnical, planning, surveying, and transportation. Types of clients include cities/counties, governmental, institutional, educational and private sector developers.
Disadvantaged Business Enterprise

Number of Employees Nationwide ———— **55 / 62**

Number of Employees in Missouri ————

Principals: Those who own or run the firm ————

LISTING OF MEMBER FIRMS

ABNA Engineering, Inc.

35 / 40

4140 Lindell Boulevard
St. Louis, MO 63108-2914
(314) 454-0222 FAX: (314) 454-1235

Email: aadewale@abnacorp.com

URL: www.abnacorp.com

Other Offices In: 1 State

Rep(s): Abe Adewale, Nicole Adewale, Dave Diestelkamp, LaWanda Jones

Activities: ABNA provides Structural, Civil Engineering, surveying, GIS/Planning, construction management, Testing & Inspection for public works infrastructure, industrial, educational, healthcare and commercial projects. Types of clients include MoDOT, MSD, Metro, St. Louis Airport, Counties, Municipalities, School Districts, Industrial Corporations, and Park Districts.

Disadvantaged Business Enterprise

Minority Business Enterprise

Women Business Enterprise

AECOM

137 / 54,000

100 N. Broadway, 20th Floor
St. Louis, MO 63102
(314) 429-0100 FAX: (314) 429-0462

Email: jc.murray@aecom.com

URL: www.aecom.com

Branch Office:

2380 McGee Street, Suite 200
Kansas City, MO 64108

(816) 561-4443 FAX: (816) 561-2863

Other Offices In: 45 States

Rep(s): Jennifer Obertino, Jim Hummert, J.C. Murray

Activities: Across all components of the project life-cycle – design; build; finance & operate – AECOM Technical Services, Inc. (AECOM) is positioned to deliver consulting services from a global platform (over 150 countries). These services include all aspects of planning, environmental science and engineering; civil, structural, geotechnical, mechanical, electrical, chemical and process engineering; as well as architecture and construction management. The primary markets served include surface and air transportation, municipal water and wastewater utilities, solid and hazardous wastes, environmental, geotechnical and information solutions – for both public, private, and federal sector clients.

Rep(s): Lucas Kim, Jeff Kochelek

Activities: Engineered Corrosion Solutions (ECS) is a corrosion engineering firm specializing in helping clients understand and manage risk associated with leaking fire sprinkler systems. The risks associated with corrosion in fire sprinkler systems include life safety risk, structure risk, property risk and business continuity risk. Corrosion in fire sprinkler systems leads to plugging problems, reduced sprinkler performance, water leak damage and reduced service life of the systems. Our goal is to define and understand the root causes of corrosion in fire sprinkler systems and to provide devices and services that can bring about a reduction in those risks and associated costs. ECS offers a suite of corrosion management devices and treatment programs that address the needs of all water-based fire sprinkler systems. Wet Pipe Nitrogen Inerting (WPNI) and Dry Pipe Nitrogen Inerting (DPNI) technology from ECS completely controls internal corrosion. ECS also offers a suite of analytical and assessment services to identify the root causes of corrosion and meet the fire sprinkler system inspection requirements by the NFPA. These services include internal video scoping, system failure review, water and deposit analysis, and failed pipe analysis.

Activities: GHD is one of the world's leading professional services companies operating in the global markets of water, energy and resources, environment, property and buildings, and transportation. We provide engineering, environmental, advisory, digital, and construction services to private and public sector clients. Established in 1928 and privately owned by our people, GHD operates across five continents - Asia, Australia, Europe, North and South America - and the Pacific region. We employ more than 10,000 people in 200+ offices to deliver projects with high standards of safety, quality and ethics across the entire asset value chain. Driven by a culture of client service excellence, we connect the knowledge, skill and experience of our people with innovative practices, technical capabilities and robust systems to create lasting community benefits. Committed to sustainable development, GHD improves the physical, natural, and social environments of the many communities in which we operate. We are guided by our workplace health, safety, quality, and environmental management systems, which are certified to the relevant international standards (ISO and OHSAS). In alignment with the global demands of water, energy and urbanization, our aim is to exceed the expectations of our clients and contribute to their success.

Activities: Founded in 1917, HDR is an architectural, engineering and consulting firm that excels at complex projects and solving challenges for our clients. With locations across the nation and abroad, we deliver more than 50 different design and scientific disciplines. The strength of this professional network allows us to deliver big-company resources with small company service. Our operating philosophy is to be an expertise-driven national firm that delivers tailored solutions through a strong local presence. Our ability to draw upon company-wide resources and expertise is a great strength in meeting and exceeding our clients' expectations. In 2008, HDR acquired Archer Engineers, a well-respected full service Environmental/Civil Engineering consulting firm. Archer traditionally has provided outstanding service to a wide range of governmental, industrial and private development clients. HDR has full services in water and wastewater systems, transportation systems, environmental and resource management, land planning, surveying, construction administration, and design/build services.
