

ACEC Missouri

2026 Environmental & Energy Conference

SPEAKER

Jeff Graham
Group Leader / Site Design
Olsson, Inc.

BIOGRAPHY

As the group leader of Olsson's Data Center Site Design team, Jeff is dedicated to helping clients make confident site development decisions. Jeff leads site due diligence efforts for large scale data center developments across the United States, helping clients evaluate, select, and prepare complex sites for successful development. Through a combination of technical expertise and a deep understanding of complex project context, he understands how thorough site evaluation can shape project outcomes. His work spans the full spectrum of site due diligence, from identifying development risks and technical constraints to environmental evaluations and campus planning. Jeff strives to create a collaborative partnership with owners, consultant teams, technical specialists, utility providers, and site jurisdictions to support an informed decision-making process from conceptual site development through construction planning.
